PostgreSQL  
Bootstrap  
Git  
GitHub  
MVC Architecture  
OOP  
Figma  
Photoshop  
Illustrator  
After Effects  
InDesign

## ABOUT ME

I have 4 years experience in design and animation and I'm now a fullstack web developer combining my creative skillset and attention for detail. I have built and shipped user-ready Ruby on Rails web applications and completed Le Wagon London's coding bootcamp. Previously, I built a company website for Azure Designs using WordPress, which is limiting. So I decided to learn to code and make a career change that I am loving and want to continue with. I am looking to join an exciting company where I can continue to learn and challenge myself to improve amongst a great team.

## WEB DEVELOPMENT PROJECTS

### Brunchees

Web app to search and book for brunches in the desired area.

Built with Ruby, Ruby on Rails, HTML, CSS, Javascript, Heroku and ActiveRecord.

Working in a team I used Figma to draft a rough layout of the website.

built the front-end for index, show and profile page. I generated the search filter feature on index page, booking form and menu toggle on show page. Fixing front-end bugs.

<http://brunchee.rocks/>

### My Venues

Managing a team on Git and GitHub to build a web app for booking venues for events.

Built with Ruby, Ruby on Rails, HTML, CSS, Javascript, Heroku and ActiveRecord.

Building the front-end for home, index, show profile page. Fixing front-end bugs

<https://my-venues.herokuapp.com/>

### Mister Cocktail

Web app for adding and listing cocktail recipes.

Built with Ruby, Ruby on Rails, HTML, CSS, Javascript, Heroku, Ajax and ActiveRecord.

My personal project building all back-end controllers and front-end design.
